

A N
ALMANACK

For the Year of our Lord God,
1699.

Being the Third after the Leap-year;

And from the Creation 5699.

Calculated for the Meridian of the City

or Middle of England, whose Latitude is 51 30.

And therefore far more Usefull for this King-

dom in general, than any other extant.

As also, for the whole Kingdom of Great Brittain.

By W. TURNER Gent.

In this Almanack are contained the following

1. A Description of England, and a general Tide-Table.
2. A Chronology of memorable things.
3. The Sun's Rising, Setting, Length of the Day & Night, and his place in the Ecliptick, and break of Day.
4. The Change, Full and Quarters of the Moon, with the time that every Planet meets with the Moon.
5. Choice Rules for Husbandry and Gardening.
6. Prefidents for making Bills, Bonds, Wills, Leases, &c.
7. Tables for Interest of Money, and for the Purchasing of Lands or Leases of Houses.
8. To measure and set out Land. — 9. To gauge Vessels.
- 10. To find the hour of the Day by the Sun.
11. The Sun's Declination against every day in the Year.

LONDON. Printed by J. Heptinstall, for
the Company of Stationers. 1699.

A Brief CHRONOLOGY.

	T HE Conquest of <i>England</i> by Duke <i>William</i>	655
	The Invention of Guns	319
	The Art of Printing was invented	249
	The infectious Sweating Sicknes	248
	The Massacre in <i>France</i>	126
	The whole Heavens seemed to burn with Fire	125
	The general Earthquake in <i>England</i>	119
	The Camp at <i>Tisbury</i> in <i>Essex</i>	111
	The Gunpowder Treason	94
	The Plantation began in <i>New England</i>	68
	The third part of <i>London Bridge</i> burnt	67
	The Earl of <i>Scrafford</i> was beheaded May 12	58
	The <i>Irish</i> Rebellion began October 23. 1641.	58
	The Fight at <i>Edge-Hill</i> , October 23. 1642.	57
	The Fight at <i>Brainford</i> , November 12. 1642.	57
	The <i>Scots</i> entred <i>England</i> , January 16.	56
	The Fight at <i>Newberry</i>	55
	<i>Marston-Near</i> Fight July 2.	55
	The great Fight at <i>Naseby</i> , June 14. 1645.	54
	King <i>Charles I.</i> was murdered, January 30.	51
Since	<i>Cromwell</i> made General, June 26.	49
	The <i>Scots</i> routed at <i>Dunbar</i> , November 3.	49
	The great Fight at <i>Worcester</i>	48
	King <i>Charles II.</i> returned to <i>London</i> , May 29.	39
	King <i>Charles II.</i> was Crowned, April 23.	38
	The strong Tempestuous Wind, February 18.	37
	Three Blazing Stars appeared	34
	The last great Plague in <i>London</i>	34
	A great Fight between the <i>English</i> and <i>Dutch</i>	33
	The great Fire in <i>London</i> , September 3, 4, 5, 6.	33
	The last great Snow 11 days	25
	The Popish Plot Discovered	22
	A great Frost continuing 10 Weeks, so that the <i>Thames</i> was Frozen beyond <i>Graves-End</i> , and Fairs or Markets daily kept, and all manner of Sports and Pastimes exercised upon the Ice; and the Summer following proved a very dry Season.	15
	K. <i>James II.</i> and Q. <i>Mary</i> Crowned, April 23.	13
	K. <i>Will. III.</i> and Q. <i>Mary</i> proclaimed King and Queen.	10
	Q. <i>Mary</i> died December 28	4
	Peace with <i>France</i> , &c.	11

Of ENGLAND in General.

Forasmuch as this Almanack is calculated for the Meridian of the Centre or middle Latitude of this Kingdom, it is not improper to give some short account of the same. Know therefore that the most Northberly part of England lies in the Latitude of 56 deg. where their longest day is 17 hours 20 min. and their shortest 6 hours 40 min. The most Southerly part lies in the Latitude of 50 d. 30 m. So that their longest day is 16 ho. 8 m. and shortest is 7 h. 52 m. And the Latitude for which this Almanack is calculated is for the 54 deg. which is much about the middle thereof, the nearest eminent place thereto being YORK, where the longest day is 16 hou. 54 m. and the shortest 7 h. 6 m. a mean between the two former extreams, and therefore of more general use to the Kingdom in general than any one extant.— This Kingdom is in length from Barwick in the North to the Isle of Wight in the South 320 miles, and in breadth from Dover in the East, to the Lands end in Cornwall in the West about 300 miles.— Its compass is about 1300 miles. Its form is not much unlike the form of an Axe or Hatchet, and the whole contains about 30 millions of Acres, which is about one thousand part of the whole Globe of the Earth and Sea together, and is the 333d part of the hitherto discovered part of the habitable World.— This Kingdom (Wales included) consists of

Counties	52	Bishopricks	24
Islands	8	Deanries	60
Cities	25	Arch Deanariets,	544
Mark. Towns	713	Prebendaries, &c.	
Parishes	9725	Hundreds	768
Archbishopricks	2	Cinque Ports	7

The use of the Table.

IN the last Column of the Almanack you have the Moons Age against every day in the Year, which being found in the first Column of this Table, right against it in the same Line you have the hour and minute of Full Sea or High Water at all the places mentioned at the head of the Table. As for Example. When the Moon is 5 days old, it will be High Water at London, Tinnmouth, &c. at 7 a clock, and at Bristol, Lanion, Foulness, &c. at 10 a clock and 44 min. after. And so of all the rest.

On these Days viz.

T U R N E R.

Choice and Excellent Rules for Husbandry and Gardning, to be Observed and put in Practice in every Month throughout the Year.

In JANUARY.

Trench Ground. Prepare Soil. Dig Borders. Uncover Roots of Trees. Plant Quick-sets. — Transplant Fruit Trees, Set and prune Vines and Fruit Trees. Nail Wall Fruit. Garche Cyons. Cleanse Trees of Moss in moist Weather. — Set Beans and Pease, and sow for early Colliflowers. — If you will Raise in the Hot bed; Sow Chervil, Lattice, Raddish and other Salattng — Set Traps for Vermine in Nurseries. Plant Kernels and Stones, and Anemony Roots Preserving them with Ranunculuses sown in September or October: Also Carnations, and such Seeds as are in danger to be washed out, or over chilled with Rain, Frost or Snow.

In FEBRUARY.

YOU may yet plant Fruit Trees, Vines, Hops and Shrubs, and also set Kernels and Stones. Cut and lay Quick-sets, Sow Asparagus, Beans, Pease, Raddish, Parsnips, Carrots, Onions and Garlick. — Plant Cabbage Plants, Potatoes, Colliflowers, Parsly, Spinage, and other hardy Pot-herbs. — Cleanse your Trees from Moss and Canker; Earth up the uncovered Roots of Trees. Begin to graft for Apples, Pears, Plums, Cherries, &c. — Begin to make your hot Bed for the first Mellons and Cucumbers; cut off the Webs and Catterpillars from the tops of Twigs, and gather Worms in the Evening, after Sun Set. — Sow Alaternus Seed in Cases, or open Beds covered with Thorns or Bryars.

TURNER.

In MARCH.

USE Stercorations: Raife on hot Beds Mellons, Cucumbers, Gourds, &c. Graft, Slip and Set Sage, Rosemary, Lavender, Thyme, &c. — Sow Endive, Succory, Leeks, Raddish, Beets, Parsnips, Skirrets, Parsly, Sorrel, Boglace, Borage, Chervile, Sellory, Smalage, Alifanders, &c. Also Lattice, Onions, Garlick, Orach, Purslin, Turnips, Pease, Carrets, Cabbages, Cresses, Fenel, Marjoram, Basil, &c. — Transplant Medicinal Herbs, and Asparagus Roots, Beet-Charres sown in *August* — Dress and string Strawberry Beds. Stake and bind up weak Plants. — Sow Pinks, Sweet Williams, Carnations, Pine-kernels, Fir-seeds and Payes — Plant Jasmine and Animony Roots. Transplant Carnations, Seedlings and Fibrous Roots. Fence your choice Anemonies, Auriculus, &c. with Mats, from nipping Frosts.

In APRIL.

SOW Marjoram, Hyssop, Basil, Thyme, Winter Savory, and Scurvygrass: Also Lattice, Purslin, Colliflowers, Radish, Double Marygolds, Cyony, Candy-tufts, Garden Pursley, Muscipula, Scabions, Pinks, Carnations, Sweet Williams, &c. — Plant Mellons, Cucumbers, and the Slips of Artichokes, Lavender, Thyme, Rosemary, &c. — Set French Beans, gather out Worms and Snails on Rainy Evenings — Transplant and remove tender Shrubs, as Spanish Jasmynes, Myrtles, Oleanders, young Oranges, Pomgranates, &c. — If Winds be past, clip (after Showers) Philirea, Alaternus, Cypress, Box, Myrtles, Barba-Jovis, and other Tonicle Shrub.

TURNER.

In *MAY*.

SOW Sweet Marjoram, Basil, Thyme, Hot and Aromatick Herbs, and the most tender Plants. Also Purslan, Lattice, painted Beans, &c. — Look well to your Mellons, and towards the end of this Month forbear to cover them on the ridges, with Straw or Matrices — Ply the Laboratory, distilling Plants for Spirits, Waters, &c. Pull up Weeds before they seed — Give your Houfed Plants fresh Earth, a handfull or more deep, loosening the rest with a Fork without wounding the Root; let the fresh Earth be very fine and rich — Shade your Cornations and Gilliflowers after Mid-day — Plant Stock-Gilliflowers in Beds; and at the full of the Moon gather Anemomy Seeds — Take up dried Tulips, and cover such as are bare.

In *JUNE*.

SOW Lattice, Chervile, Raddish, &c. — Cleanse Vines of Exorbitant Branches, stopping the Joint: Inoculate Apricots, Peaches, Cherries, Plums, Apples, Pears, &c. — Gather Herbs at the Full of the Moon, dry them in the Sun. Distill Aromatick Plants. Water planted Trees, and put half rotten Fern about their stems — Transplant Autumnal Cychamens; gather the ripe Seeds of choice Flowers. Inoculate Roses, and rare Shrubs — Take up your rarest Anemonies, Ranniculuses, Tulip-bulbes, and all such Plants and Roots as endure not well out of the Ground, and plant them again.

TURNER.

In JULY.

SOW Lattice, Raddish, &c. for tender Saletting, and latter Pease. Water young planted Trees and Layers, prune Apricocks and Peaches, saving the most likely Shoots well placed — Let such Olitory Herbs run to Seed as you would save. Slip Stocks and other liguour Plants and Flowers. Lay Myrtles, and other curious Greens, as also Carnations and Gilliflowers for increase — Water young planted Shrubs and Layers. Clip Box (growing out of order) after Rain. Cut off withered Stalks of lower Flowers — Water your Gravel Walks in the driest Season, with Brine, Pot-Ashes Water, and a Decoction of Tobacco refuse, to destroy Worms and Weeds — top the exuberant Shoots of Vines at the second Joynt above the Fruit.

In AUGUST.

INnoculate early. Prune off superfluous Branches and Shoots of the second Spring; pull up Suckers — Sow Raddish, tender Cabbages and Colliflowers for winter Plants — Sow Corn, Sallet, Marigolds, Latrice, Carrots, Parsnips, Spinnage, Onions, Curled Endive, Angelica, Scurvigrass, Grifis, Larks Heel, Candi-rafts, Columbines, Iron-coloured Fox Gloves, Holy Hocks, and such Plants as indure winter — Transplant such Lattice as you would have endure all winter: pull up ripe Onions and Garlick — Gather Olitory Seeds; clip such Herbs before the full an handfull high — Plant Anemonies, slip Gilliflowers, and gather Seeds of Shrubs being ripe — Take up Bulbes of Lillies. Remove and lay perennial Greens, Oranges, Lemmons, Myrtles, &c. — Sow Purslan, Chard-Best, Chervile — Make Summer Cyder and Perry.

TURNER.

In SEPTEMBER.

Gather your ripe winter Fruit in dry weather — Sow Raddish, Lattice, Spinage, Parsnips, Skirrets, Colliflowers, Cabbages, Onions, Scurvigrass, Anniseeds and Winter Herbs — Transplant most sorts of Esculent and Physical Herbs, Artichokes, Sparagras Roots and Strawberries (out of the woods) All fibrous plants; as Hepotica, Hellebore, Camomil, Capricarias, Matricarias, Violets, Primeroses — Bind your Autumnal Flowers and Plants to Stakes — Set such Plants into the Earth (as will not endure the House) in pots 2 or 3 inches lower than the surface of the Earth, Exposing them toward the South — About *Michaelmas* (the weather being fair, and not foggy) retire your choice plants and rarest Greens (being dry) as Oranges and Lemmons, *Indian* and *Spanish* Jasmine, &c.

In OCTOBER.

Trench Ground for Orcharding and Kitching Gardens. Plant Fruit trees of all sorts when they have lost their Leaves; and let your Wall Trees be of above a Years Grafting — Use oblaqueations and laying bare the Roots of old un-thriving, or over hasty blooming Trees. Gather Fruit dry the Moon decreasing. Plant and plash Quicksets — Sow all stony and hard Kernels and seeds, as Plumbs, Cherries, Nuts, Ash-Keys, Acorns, Crab and Pear Kernels, Almond-stones, &c. Sow Lattice. Make winter Cyder. Sow as in *September*. Plant choice Tulips — Plant Anemonies and Raniculusses in fresh sandy Earth taken from under the Turf — Retire Carnations, &c.

TURNER.

In NOVEMBER.

TURN your Mellon Ground, and mingle it with Earth laying it in Ridges for the spring ----- Trench and fit Ground for Artichokes. Set and plant Trees standard or Murall ----- Furnish your Nursery with stocks for grafting. Sow and set early Beans and Pease. Lay in Cellars (to be transplanted at spring for Seed) Carrots, Parsnips, Turnips, Cabages and Colliflowers. — Gather your last Orchard fruit dry; and dig up your Potatoes as clean as you can — Crop Asparagras, and cover it with long dung, or make Beds to plant in the spring. Sow Auricula seed, Cover peeping Renoculusses; plant Tulips under shelter, the Earth not too rich — plant Forrest Trees for Walks, Avenues and Groves — Also plant Fibrous Roots; as Roses, Althæafrutex, Lilax, Syringas, Cyrisus, Peonies, &c.

In DECEMBER.

PRune and nail standard Trees and wall Fruit — Plant Vines and Stocks for Grafting. Sow yet Potage of Cyder-pressings for Nurseries. Set all sorts of Kernels, Stones, &c. Sow early Beans and Pease — Trench Ground and dung it for Borders planting Fruit-Trees. Turn and refresh Autumnal fruit, opening the Windows on a clear day, and set Vermine Traps — Preserve your choicest Anemonies, Cornations, &c. from great Rain and Frost. Let the Door and Windows of your Conservatory be well matted and guarded from piercing Air. Temper the Air with a little Charcole put into a hole sunk a little into the middle of the Floor. Set Bayberries dropping ripe. Cover your Fountain pipes with fresh and warm Litter out of the Stable, &c.

The Use of this Table.

Example: To find the Interest of 70 l. for 6 months, find 70 l. in the first Column, and right against it, in the Column of 6 months is 2 l. 2 s. and so much is the Interest. For the Interest of the same sum in 9 months, look for the Interest in 3 months, which is 1 l. 1 s. this add to the Interest for 6 months, the sum is 3 l. 3 s. the Interest of 70 l. in 9 months. Also to find the Interest of 75 l. for 3 months. First look the Interest of 70 l. for 3 months, which is 1 l. 1 s. Likewise the Interest of 5 l. for 3 months is 1 s. 6 d. this added to 1 l. 1 s. maketh 1 l. 2 s. 6 d. which is the Interest of 75 l. for 3 m.

TURNER.

The Use of the Table.

IF you would set out a piece of Garden Ground of any number of Acres, and to be of any number of Perches broad : Or by having the breadth of any Furlong or Furlongs together in perches, you may readily by this Table find what quantity of Ground is contained in it or them together ; And for the ready making use of this Table, it is required to have a rod or pole of sixteen foot and a half in length, divided first into ten equal parts by Brais Nails struck into it, and again, let every one of these ten parts be also divided into ten smaller equal parts, by Notches or smaller Nails driven therein. And such a pole as this (or one of half the length may serve) every Countrey Gentleman or Farmer, or any that let out Ground to Reap, Sow, Mow or Hedge, ought to have, for by it and this Table he may cast up his own Ground without troubling a Surveyor. I shall shew the Use of the Table by Examples.

Example 1. If the side or end of a Field be 15 Pole or Perches broad, how many Pole of that breadth will make one Acre ?

Look in the Table for 15 in the first Column towards the left hand, and right against it in the next Column you shall find 5. 33. which is 5 pole and 33 hundred parts of a pole, and so much must be measured to set out half an Acre at 15 pole broad. ——— In the next Column (against 15 pole broad) you find 10. 66. which is ten pole, and 66 hundred parts of a pole, and so much will be a just Acre. Wherefore, if with such a pole above-mentioned, you measure out 10 of those poles, and 6 of the greater, and 6 of the lesser divisions of your pole, the end of that measure shall be a just Acre : So likewise,

TURNER.

	Perches.		Per. parts.	
If the breadth of	{ 6	Perches	{ 26. 66	In length will be a just Acre.
the Ground be	{ 9	broad	{ 17. 77	
	{ 10		{ 16. 00	
	{ 21		{ 7. 62	

Example 2. If the breadth of One, or several Furlongs together in Common Field, should contain in breadth at one end 12 Perches, and at the other end 22 Perches, how much in length will make an Acre throughout that Piece?

Because the breadth at both the ends are unequal, add them together: So 22 and 12 added together make 34. the half whereof is 17. which number you must use as if it were the breadth throughout. Wherefore look in the first Column of the Table for 17, and right against it you shall find 4 Rod 71 parts for half an Acre; in the next Column against 17 you shall find 9 Rod 42 parts for One Acre; the next Column 18 pole 82 parts for 2 Acres, and in the last Column 27 pole 25 parts (or one quarter of a pole) for three Acres. And if your furlong be longer, you may begin again, and add 9 pole 42 parts for four Acres, &c. But when you come towards the end, and find you have not enough to make out half an Acre, then take the remaining length and call that the breadth, and then see what part of an Acre that will be, which added to the former will give you the true quantity desired in the whole: This Table may be applied to plowing, Reaping, Mowing, and divers other things belonging to Land Measure.

A

A Table whereby to gauge or find the quantity that any Vessel or Cask contains either in Wine or Ale Gallons.

Inches of the Diameter of any Cask at the Head or Butt.

Inches of the Diameter of any Cask at the Head or Bung.

The use of the Table for Gauging of Vessels.

TO know how many Gallons (either in Wine or Ale Measure) any Cask containeth by this Table, you must— (1.) Take the Diameter at the Head of the Vessel, and also the Diameter at the Bung in inches— (2.) Find the number of inches at the Head of the Vessel in the first Column of the Table, and the number which standeth against those inches set down. -- (3.) Find the number of inches of the Vessels Bung, in the same first Column; and the number that standeth against them, set down under the former number, twice. (4.) Add these three numbers together. --- (5.) Take the length of the Vessel in inches (in the inside) --- (6.) Multiply the sum of the three former numbers added together, by the number of inches the Vessel is long, and from the product of the Multiplication, cut off three figures, towards the right hand; so shall the figure or figures toward the left hand be whole Gallons: and the three figures towards the right hand are thousand parts of one Gallon. One Example will make all this plain.

2. In a Cask whose Diameter at the Head is 18 inches, at the Bung 32 inches, and in length 40 inches, how many Gallons is contained therein, both in Wine & Ale Measure?

	Wine	Ale
The Diameter at the Head 18 inches —	0. 367	0. 301
The Diameter at the Bung 32 inches —	1. 160	0. 951
The same again —	1. 160	0. 951
	2. 687	2. 203
Multiply by the length 40 inches —	40	40
The Content of the Vessel in Gallons —	107 480	88 120

The Content of { 107 gallons & 2 quarts { Wine }
the Vessel is { 88 gallons and 1 pint { Ale } measur

For 125 is a pint, 250 a quart, 375 is 3 pints, 500 is 2 quarts, 625 is 5 pints, 750 is 3 quarts, and 875 is 7 pints.

The use of the Table, and thereby to find the hour of the day.

YOur Staff or other streight Ruler being divided, first into 10 equal parts, and then each of those into other 10 equal parts, then will the Staff (or Ruler) be divided into 100 equal parts, which ought to be numbred at every 10 by 10, 20, 30, &c. to 100.

Your Staff being thus prepared, when you would find the hour of the day thereby, you must erect it perpendicular, or set it upright upon some plain level Ground or place, and note the place where the end of the shadow of the Staff did light upon the ground; then with your Staff measure the length of the Shadow thereof in Staves lengths and hundred parts of one length, according as 'tis numbered. This done,

Examp. 1. Suppose that upon the 6 day of *May* I erect my Staff perpendicular, and measuring the length of the shadow thereof, I find the shadow to contain twice the length of my Staff, and 24 parts more. Wherefore I look in my Table for the 6 day of *May*, which I find in the first Column towards the left hand, and casting my eye along that line towards the right hand, I find 2, 24 to stand in the 7 Column, at the head whereof is in figures 7. 5. which tells me that it is either 7 of the clock in the morning, or 5 in the afternoon.

If this Observation had been made upon the 16 of *July*, and the length of the shadow the same, the hour of the day would have been the same also; for both those days are of equal length, and so is the 21 of *February* and the 1 of *October*, — the 16 of *April* and the 6 of *August*, &c.

Examp. 2. Upon the 16 of *April* (or the 6 of *Aug.*) I erect my Staff, & find the length of the shadow to be once the Staffs length and 30 parts more; I look in the line against *Aug. 6* and *April 16* for 1. 30 (the length of the shadow) and in the 5 Column I find 1. 33 (which is the nearest number to it in the Table) over which there stands 9 & 3, which shews that it is almost 9 in the Morn. or a little after 3 in the Aft.

Examp. 3. Upon the 26 of *May* or the 26 of *June*, I find the length of the shadow of the Staff to be once in length and 20 parts more; if I seek for this length 1. 20 against *May 26* and *June 26*, I can find no such number, but the nearest is 1. 1, over which stands 9. 3, and the next number greater is 1. 38, over which standeth 8. 4, and so you may conclude that the hour is between 8 and 9 in the Morning, or between 3 or 4 in the Afternoon.

Bills

TURNER.

Bills and Obligations, One to One.

K NOW all men by these presents, that I *John Ashley* of *Gaywood*, in the County of *Norfolk*, Yeoman, do owe and am indebted unto *John Anoaks* of *Giton*, in the County abovesaid, Gentleman, the summ of One and Twenty Pounds of good and lawfull Money of *England*, to be paid to the abovesaid *John Anoaks*, his Heirs, Executors, Administrators, or Assigns, in and upon the first day of *May* next ensuing the date hereof, at or in the now dwelling House of the abovesaid *John Anoaks*, for the which payment well and truly to be made, I bind me, my Heirs, Executors and Administrators, in the summ of Forty Two Pounds of like Moneys of *England*, firmly by these presents, In witness whereof, I have hereunto set my Hand and Seal the first day of *June*, 16

*Sealed and Delivered
in the presence of*

A Let.

TURNER.

A Letter of Attorney to receive a Debt.

K Now all men by these presents that I *John Rose* of *Halstead* in the County of *Norfolk* Gent. have assigned, ordained, and made, and in my stead and place by these presents put and constituted my trusty and well beloved friend *Thomas Rose* of *Halstead*, in the County of *Suffolk* Gent. to be my true and lawfull Attorney, for me, and in my name, and to my use, to take, ask, sue for, levy, require, recover, and receive of *George Brame* of *Halstead* in the County of *Suffolk* Gent. all and every such Debts and sums of Money which are now due unto me by any manner of ways or means whatsoever, giving and granting unto my said Attorney, my whole power, strength, and authority, in and about the Premises: and upon the Receipt of any such Debts, or sums of Money aforesaid, Acquittances, or other Discharges for me, and in my name, to make, seal, and deliver, and all and every such act and acts, thing and things, devise and devises whatsoever in Law, for the recovery of all, or any suits, debts, or sums of money as aforesaid, for me, and in my name, to do, execute, and perform, as fully, largely, in every respect, to all intents, constructions, and purposes, as I myself might or could do if I were there in my own person present: ratifying, allowing, and holding firm and stable, all and whatsoever my said Attorney shall lawfully do, or cause to be done, in, or about the execution of the Premises, by vertue of these presents. In witness, &c.

A Copy of a Will.

IN the Name of God, *Amen*. The 1 day of *July* 16 according to the Computation of the Church of *England*, I *Edward Nonsuch* of *Kings-Lyn* in the County of *Norfolk* Gent. being of perfect Memory, and Remembrance, praised be God, do make and ordain this my last Will and Testament, in manner and form following.

VIZ.

First, I bequeath my Soul into the hands of Almighty God my Maker, hoping that through the Meritorious Death and Passion of *Jesus Christ* my onely Saviour and Redeemer

TURNER.

Redeemer to receive free pardon and forgiveness of all my sins ; and as for my body to be buried in Christian Burial at the discretion of my Executrix hereafter nominated.

Item, I give unto my Son *Edward Nonsuch* the sum of Five Hundred Pounds. *Item*, I give unto my Daughter *Short* the sum of Five Hundred Pounds. *Item*, I give unto my Daughter *Julian*, the sum of Five Hundred Pounds.

Item, all the rest of my Houses, Leases, Lands, Tenements, and Goods whatsoever, I give unto *Susan* my Wife for term of her life, and then to my Son *Edward* and his Heirs for ever, upon condition that she shall pay all my Debts and Legacies, and make her sole Executrix of this my last Will and Testament, revoking all other Wills and Testaments.

In witness whereof I have hereunto set my Hand and Seal the Day and Year first above written.

A Letter of Attorney general to receive Debts and Rents.

K NOW all men by these presents, that I *John Rose* of *Wilton*, in the County of *Kent*, Yeoman, have Assigned, Ordained, and made, and in my stead and place, put and constituted my trusty and wel-beloved friend *Francis Rose* of *St. John's* in *Yorkshire*, Yeoman, to be my true and lawfull Attorney, for me, and in my name, and to my use, to ask, sue for, levy, require, recover, and receive of all and every person and persons whatsoever, all and every such Debts, Rents, and sums of Money as are now due unto me, or which at any day or days, time or times hereafter shall be due, owing, belonging, or appertaining unto me by any manner of way or means whatsoever: Giving and Granting unto my said Attorney by the Tenor of these presents, my full and whole power, strength, and authority, in and about the Premises, and upon the Receipt of any such Debts, Rents, and sums of Money, aforesaid, to give Acquittances or other Discharge, for me, and in my name, to make, seal, and deliver, and all and every other act or acts, thing or things, device and devices in the Law whatsoever, needfull and necessary to be done in or about the Premises, for the recovery of any such Debts, Rents, or sums of money as aforesaid,

TURNER.

foresaid, for me, and in my name, to do, execute and perform, as fully, largely, and amply in respect, to all intents, constructions, and purposes, as I my self might, or could do if I were personally present: Ratifying, allowing, and holding firm and stable, whatsoever my said Attorney shall lawfully do, or cause to be done, in or about the execution of the same, by virtue of these presents. In witness whereof, I have hereunto put my Hand and Seal, *July 20. 16*

An Indenture for an Apprentice Bound out by the Parishes.

THIS Indenture made the 2d. day of *June*, one thousand six hundred _____ according to the computation of the Church of *England*, &c. Witnesseth that the Church-wardens and Overseers of the Poor of the Parish of *St. Margarets* in *Kings-Lyn* in the County of *Norf.* with the consent of *John Piercival*, Major, and *Francis Parlet*, Recorder, Esq; two Justices of the Peace for the Parish, according to the Statute in that case made and provided: Have placed and put forth *Joan Rose* an Apprentice with *John Rose* of *Kings-Lyn* aforesaid, Waterman; for and till she be of the full age of one and twenty years, from the day of the date hereof: during all which term, the said *John Rose* doth Covenant to find unto the abovesaid *Joan Rose* his Apprentice, sufficient Meat, Drink and Apparel, Washing and Lodging sufficient for such Apprentice, and at the end of the said term, to give her two suits of Apparel, the one for Holy-days, the other for Working-days. In witness whereof they have interchangeably set their Hands and Seals the Day and Year above written.

*Sealed and Delivered
in the presence of*

A Single Penal Bill.
